EDUCATION

Purdue University

Bachelor of Science, Computer Science

West Lafayette, IN

Aug. 2020 – May 2024

EXPERIENCE

Ford Motor Company

Software Engineer

Dearborn, MI

July 2024 – Present

- Led enhancements to the Web Based Dealer Ordering platform using Angular, Java, and Spring Boot to capture real-time regional dealer feedback, enabling efficient capacity planning and contributing to \$100M+ in annual inventory cost savings
- Provided full-stack production support for critical dealer applications across North America, diagnosing and resolving issues in both frontend (Angular) and backend (Java/Spring) services and SQL workflows, ensuring 99.98% uptime and rapid issue resolution within SLA targets for 3000+ dealerships
- Redesigned and implemented a full-stack microservice for 3000+ dealerships to prevent incomplete retail order submissions and ensure end-to-end data integrity across downstream systems

Software Engineer Intern

June 2023 – Aug. 2023

- Developed rapid replenishment center enhancements on the Supply Chain IT team, resulting in a significant reduction in Ford Model E vehicle transit time from 6 months to 5 days for over 1000 dealerships
- Utilized Java and SQL to maintain an accurate list of previous dealer codes and to facilitate timely route adjustments
- Employed jQuery and JavaScript to develop an intuitive front-facing web application for carrier management, streamlining and enhancing the management process of over 100 carriers

Software Engineer Intern

May 2022 – Aug. 2022

- Designed and developed a comprehensive full-stack web application on the Web Based Dealer Ordering team to simplify and streamline the vehicle ordering process for over 3000 Ford and Lincoln dealerships
- Leveraged Angular (TypeScript) and Spring Boot (Java) to seamlessly execute CRUD operations on a MySQL database, effectively storing and managing dealers' vehicle order preferences
- Automated the deployment process using Tekton Pipeline, a continuous integration pipeline, to build frontend and backend services into a deployable state, reducing deployment time by 70%

Mentor Labs (Startup, Acquired)

Software Engineer Intern

Cambridge, MA

Aug. 2021 – Dec. 2021

- Developed a full-stack application using the PERN (PostgreSQL, Express.js, React.js, Node.js) stack to assist over 200 high school students in the college admissions process
- Leveraged React.js to create a seamless and responsive user experience on the landing page, user dashboard, scholarships, and summer programs pages, resulting in a 25% increase in user retention
- Implemented a recommendation algorithm to provide scholarship and summer program recommendations tailored to each student's profile

PROJECTS

RateMyPortfolio

JavaScript, Firebase, Next.js

June 2021 – Aug. 2021

- Developed a full-stack web application allowing users to create investment portfolios consisting of securities and rate other user's portfolios
- Leveraged Firebase Firestore to create a highly scalable database storing user and investment portfolio data to be displayed on authenticated and public routes respectively
- Implemented a robust and secure authentication system enabling users to securely sign up and log in, granting them access to user-authenticated routes

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript, Python, Swift, TypeScript

Technologies: Angular, Express.js, jQuery, MongoDB, Node.js, PostgreSQL, React.js, Spring Boot, SQL, Tekton
